The TEN 30 series is the latest generation of high performance DC/DC converter modules setting a new standard concerning power density. This product with 30W comes in an encapsulated, shielded metal package with a footprint of only 2.0" x 1.0". All models have wide 2:1 input voltage range and precisely regulated, isolated output voltages. Advanced circuit topology provides high efficiency up to 91% which allows an industrial operating temperature range of -40°C to +80°C (with derating). Further features include remote On/Off, adjustable output, under-voltage lockout and over-temperature protection. Typical applications for these converters are mobile equipment, instrumentation, distributed power architectures in communication and industrial electronics and everywhere where space on the PCB is critical.
